4:10	Bill Schuler, Guest Speaker: Engineer, Meridian Fire	Discussion on the impact of drugs in his line of work. Firefighters initiate patient care and start taking actions until paramedics arrive. The trend is Fentanyl overdoses. IV use is an immediate overdose. We are seeing pills that look just like OxyContin but are Fentanyl called "Dirty Thirty." Kratom is another type of drug trend we are seeing which has an effect like opiates. Overdoses have slowed down quite a bit despite a large number of overall overdoses throughout the Valley. It would be great if we can educate the public about what's occurring with these types of drugs and also how Narcan works.

The survey results will be sent out as an attachment with meeting minutes.
